

Story Cottage is a creative and innovative living solution for people with memory loss. Memory care patients perform best in environments that are smaller, comfortable and predictable. Story Cottage provides an intimate residence where our clients will be stimulated by activities and companionship. Custom built with our client's comfort and safety in mind, we have carefully considered and designed the interior to beautifully feel like home.

Our clients will benefit from continuous personalized care and the city's smallest patient-to-caregiver ratio. Multiple spaces, such as private rooms to share a meal, a sunroom and a library will meet the needs of our clients as they socialize with other residents and participate in planned activities. We strive to create the best day possible on a daily basis. Our caregivers curate a curriculum tailored to our client's specific emotional and physical needs. This personalized approach ensures each day is overflowing with fulfilling activities. Story Cottage partners exclusively with Senior Home Companions. With more than 25 years of experience, we have provided thousands of families with care that helps our clients live their fullest, most satisfying lives possible.

Story Cottage has two residential homes that house 8-10 residents with the diagnoses of dementia. Both of these homes are hiring with several positions available.
